

The background features a stylized globe with blue oceans and green continents. Various animals and trees are scattered around the globe. On the left, there is a large green tree and a black horse. In the bottom left, a small orange tiger is walking. In the bottom center, a white swan is visible. In the bottom right, a brown dog and a black and white dog are standing. On the right side, there are more green trees and a brown tree.

*Changing the
Narrative to Change
the Climate*

Ellen McAllister

Importance

Theorists

4 books

Research

**Lesson
Plans**

Why It's Important

- Relatability
- Climate change isn't really taught
- Inspires readers long after high school
- Allows students to learn about issues in other parts of the world

Theorists

- Albert Bandura
 - Self efficacy
 - Moral disengagement
- Benjamin Bloom
 - Bloom's Taxonomy
- Greta Gaard
 - 6 boundaries of ecoliterature
- Wolfgang Iser
 - *The Act of Reading*

A colorful illustration of a farm scene. In the top left, a brown cow stands next to a red tulip. In the bottom left, a white pig with pink cheeks and a pink nose stands. In the bottom right, a brown cow's head is visible. The background is light green with some leaves and a black silhouette of a cow's head at the top center. A central yellow box with a blue border contains the text.

4 Books

- *Saving the Planet & Stuff* by Gail Gauthier
- *Global* by Eoin Colfer & Andrew Donkin
- *A Bigger Picture* by Vanessa Nakate
- *Everywhere Blue* by Joanne Rossmassler Fritz

Research

- No “traditional” approach
- Library database for theoretical sources
- Lots of Googling ideas for hooks
 - Based on “Hook Bible”
- Resources from education classes
- 35 environmental books
- State standards
